

Specialized in Information security domain with dedicated workforce:

NetConclave Systems

“Let us not look back in anger or forward in fear, but around in awareness”. - James Thurber

As the world becomes increasingly interconnected, business professionals must pay more attention to the security of their organization's connections. It seems like every week there are new headlines about hackers bringing an organization to its knees. The stolen funds, bad publicity and embarrassing revelations are front page news. How to protect an organization from these issues? The best protection is to increase cyber awareness, implement plans and procedures. Here is an organization which supports other organizations to increase security know how and protect themselves from unseen future threats.

NetConclave saw its embodiment in the year 2004 as an authorized ECCouncil Cyber Security Training center delivering high quality Info Sec trainings to various Corporates

“Countering to the latest cyber threats is never a problem for our clients”.

like TechMahindra, IBM, Wipro, Accenture etc. Parallely they started working very closely with the Pune and Maharashtra Police on Cyber Crime Investigations. They also supported & Consulted for the Indian Army (Maharashtra region) in Cyber Security and soon started independently conducting security consulting & audits for SME's in India and abroad. Today the company takes pride in having a big client base globally with current offices in Pune headquarters, Bangalore, Dubai-UAE and very soon they are planning to come up with an office in London-UK.

Services provided by NetConclave Systems Infrastructure Security Assessment:

They use an extremely powerful security assessment methodology, the security requirements may differ from client to client. They bring in value to their customers with security team securing their businesses. Their business is aware security assessment extension to the above methodology specifically considers and includes business specific risks in addition to the standard assessment process. They perform a Black Box, Grey Box and White Box testing

as per the client needs and requirements.

Web Application Security Testing:

Expert team at NetConclave adopts an end-to-end approach for applications security. Their methodologies incorporate various elements of application security across all stages of the software development life cycle (SDLC) to enhance overall security posture of the critical business applications.

Source Code Analysis:

Their unique approach involves security expert team with strong development experience and proven analytical capabilities to examine the source code of application to identify programming and logical errors and nullify them with the best possible solution.

Mobile Application Security for Android & IOS platforms:

Their methodology & approach not only covers the security aspects of mobile application installed on the user device. But also a thorough analysis check as how the mobile application is communicating with the server and is there any web service or API exposed by the server

is vulnerable to any web based attacks.

Client Testimonials

A Case with NCORD

We at NCORD were facing major problems with implementing couple of security gaps. For fixing these gaps and not letting the architecture of the product impact anything Net-Conclave provided real time support and help. Especially insights with SHA algorithms in MVC platform is worth mentioning. With these inputs we had discussions with our US associates and they were highly satisfied with the performance of the application.

Feedback from the client:eHealthCard clients are highly satisfied by the extra security layers added as a result of the security gaps suggested and implemented by NetConclave Systems. They are well informed with the procedures and security measures that make eHealthCard application a constantly secure product.

"We appreciate the excellent consulting and assistance provided by Mr. Niranjana Reddy and NetConclave Systems for the cyber security and the technical support & assistance for fixing all the vulnerabilities and mitigating risks throughout the time for our application. His expert insights for our product NCORD eHealthCard has made the product robust and secure".

-Nilesh Kandalgaonkar, Executive Director, NCORD Healthcare LLC – USA.

"I can definitely say that I'd recommend NetConclave to anyone concerned about security. As a Security consultant their professional experience really helps us to improve our website security."

- Ranjith Sivaraman, CIO-Wheelde-New Zealand

"We are proud to be associated with NetConclave Systems and team of experienced Security professionals led by Mr.Niranjana Reddy. We thank him and his team for coming down personally and helping us resolve some critical security issues and look

forward to having a long term association with NetConclave Systems and use their services as and when we require in future for the Indian Army".

-Col. Priyank Tripathi, Auto Wing Indian Army (Maharashtra)

"I would like to thank Niranjana Reddy for the amazing 5 days of high-quality, in-depth and superlatively engaging Certified Ethical Hacker(CEH) Bootcamp in Delhi. The whole program was fantastic and it was made special by your practical insights and examples for all modules. There are not many trainers who would know the usage of all framework, concepts, tools and utilities like yourself. Your approach made it easy for us to understand and master the concepts. This was truly wonderful and looking forward to more training sessions with you".

- Urmindra Shukla, VP, Head of GIS, DR and Risk, CPA GLOBAL

SR
